

PaB: Palatine silt loam, 3 to 8 percent slopes

The Palatine component makes up 85 percent of the map unit. The natural drainage class is well drained. Water movement in the most restrictive layer is very low. This component is on hills on glaciated uplands. The parent material consists of coarse-loamy till. Depth to a root restrictive layer, bedrock, paralithic, is 20 to 40 inches.

Important farmland classification: Prime	Land capability: 2 s	Vermont Agricultural Value Group: 3
--	----------------------	-------------------------------------

Vermont Residential Onsite Waste Disposal Group and Subgroup: Ilc

This unit is moderately suited as a site for soil-based residential wastewater disposal systems, based on a review by the Natural Resources Conservation Service of criteria set forth in the Vermont 2007 Environmental Protection Rules. The depth to bedrock in some areas is the primary concern. A significant percentage of this map unit has sufficient soil depth over bedrock to accept a range of designs. On-site investigations can help avoid areas with limited depth to bedrock. Additional fill material may be needed in some areas in order to meet the separation distance requirement between the bottom of the leachfield and bedrock.

PHYSICAL and CHEMICAL PROPERTIES							EROSION FACTORS		
Soil name	Depth (In)	Typical texture	Clay (Pct)	Soil reaction (pH)	Permeability (In/Hr)	Organic matter (Pct)	Kw	Kf	T
Palatine	0-5	SIL	5-18	6.1 - 7.8	0.6-2	4.0-8.0	.32	.32	3
	5-17	CN-SIL	5-18	6.1 - 7.8	0.6-2	0.0-1.0	.24	.49	
	17-25	CNV-SIL	5-18	7.4 - 8.4	0.6-2	0.0-1.0	.20	.64	
	25-35	UWB	---	---	0-0.6	---	---	---	

WATER FEATURES						SOIL FEATURES		
Soil name	Hydrologic group	Depth to seasonal high water table (Feet)	Flooding		Ponding		Hydric soil?	Depth to bedrock (range in inches)
			Frequency	Duration	Frequency	Duration		
Palatine	C	---	None		None		No	20-40

LAND USE LIMITATIONS				AGRICULTURAL YIELD DATA	
Soil name	Land use	Rating	Reason **	Crop name	Yield / acre
Palatine	Dwellings with basements:	Somewhat limited	Depth to soft bedrock	Grass-legume hay	4.5 Tons
Palatine	Pond reservoir areas:	Somewhat limited	Seepage	Corn silage	18 Tons
				Pasture	8.5 AUM

WOODLAND MANAGEMENT				
Soil name	Management concern	Rating	Reason	Vermont natural communities
Palatine	Harvest equip operability:	Well suited		Mesic Maple-Ash-Hickory-Oak Forest, Northern Hardwood Limestone Forest Variant, Transition Hardwoods Limestone Forest Variant, Rich Northern Hardwood Forest, Sugar Maple-White Ash Northern Hardwood Forest Variant
Palatine	Road suitability:	Well suited		
Palatine	Erosion hazard (off-road):	Slight
