

High-Resolution Land Cover Summary

Supplemental Land Cover

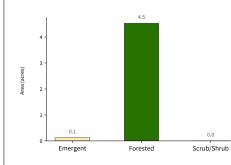

Agriculture (0 acres - 0 % of total)

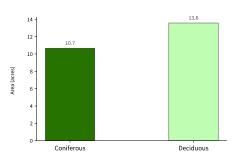

No Impervious Land Cover Mapped in this Area

No Agricultural Land Cover Mapped in this Area

Wetlands (4.65 acres - 18.6 % of total)

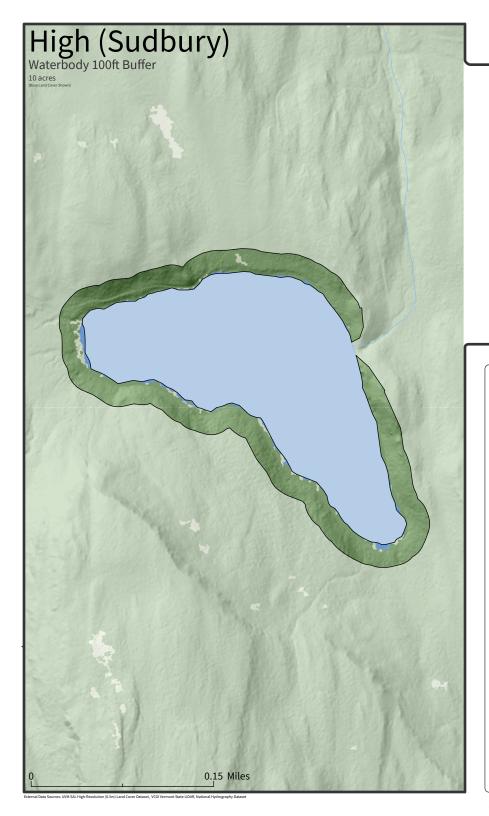

Tree Canopy (24.23 acres - 96.9 % of total)

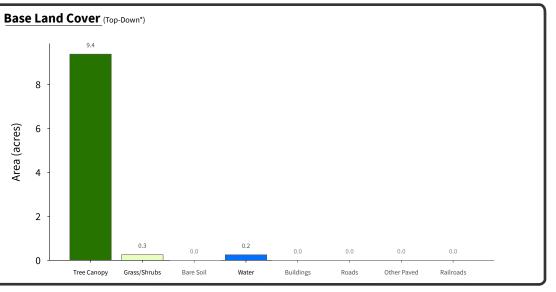

*Top-Down: A traditional land cover mapping approach - land cover is mapped as the uppermost lan **Bottom-Uo: A new land cover mapping approach - land cover is mapped as the lowermost land cov

**Bottom-Up: A new land cover mapping approach - land cover is mapped as the lowermost land cover class. This approach results in improved mapping of features overlapped/obscured by o See UVM SAL High-Resolution Land Cover 2016 Report for more detail.

High-Resolution Land Cover Summary

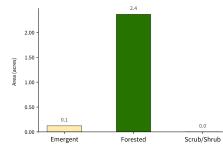

Supplemental Land Cover Impervious Surfaces (0 acres - 0 % of total) (Bottom-Up**)

Agriculture (0 acres - 0 % of total)

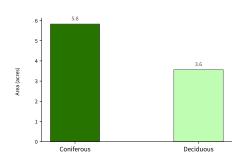

No Impervious Land Cover Mapped in this Area

No Agricultural Land Cover Mapped in this Area

Wetlands (2.49 acres - 24.9 % of total)

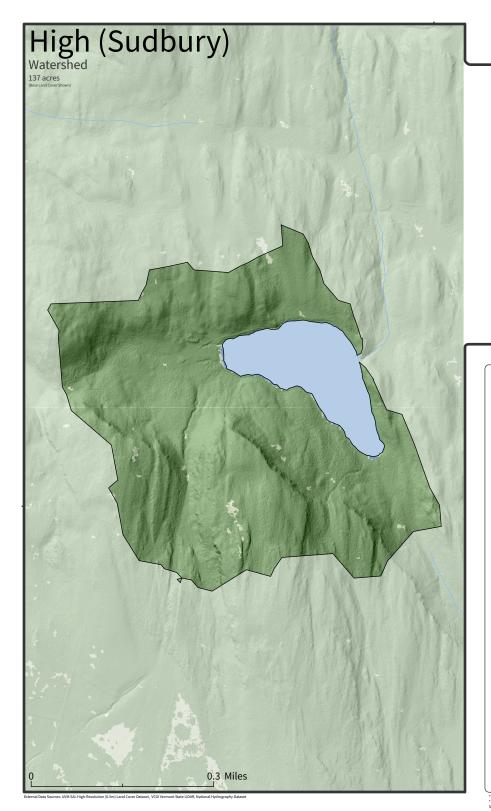

Tree Canopy (9.39 acres - 93.9 % of total)

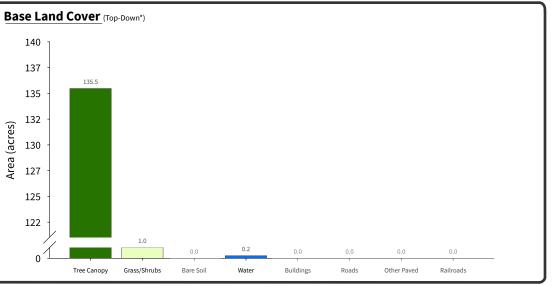

Top-Down: A traditional land cover mapping approach - land cover is mapped as the uppermost land cover class. Bottom-Uo: A new land cover mapping approach - land cover is mapped as the lowermost land cover class. This approach results in improved mapping of features ov

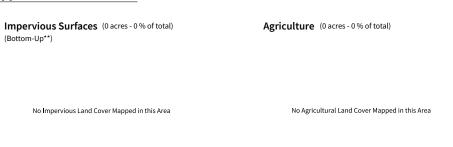

**Bottom-Up: A new land cover mapping approach - land cover is mapped as the lowermost land cover class. This approach results in improved mapping of features overlapped/obscured by other features See UVM SAL High-Resolution Land Cover 2016 Report for more detail.

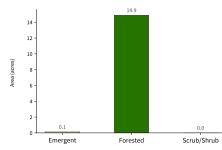

High-Resolution Land Cover Summary

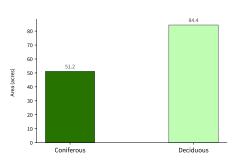

Supplemental Land Cover

Wetlands (15 acres - 10.9 % of total)

Tree Canopy (135.52 acres - 98.9 % of total)

Top-Down: A traditional land cover mapping approach - land cover is mapped as the uppermost land cover class. Bottom-Up: A new land cover mapping approach - land cover is mapped as the lowermost land cover class. This approach results in improved mapping of features ov

**Bottom-Up: A new land cover mapping approach - land cover is mapped as the lowermost land cover class. This approach results in improved mapping of features overlap See UVM SAL High-Resolution Land Cover 2016 Report for more detail.
